The phenomenon that is the object of research is the contestation of direct regional head elections for independent candidate pairs versus political party candidate pairs and the continuity of government after the regional head elections in Metro City, Lampung Province, phenomenally won by independent candidate pairs. This study aims to analyze the contestation of independent candidate pairs versus political party candidate pairs in Metro City in the 2020 regional elections won by independent candidates; develop a strategy for independent candidate pairs winning the 2020 regional election contestation to maintain the continuity of government
