Dear Editor  
International Journal of Science and Society presents  
(IJSOC)

I read and use scientific articles published in IJSOC.

The performance of the IJSOC was excellent, and the published article helped me conduct research and write scientific reports.

I am Dyah Poespita Ernawati, Lecturer from Institut Pemerintahan Dalam Negeri (IPDN), Indonesia

I have completed a scientific article entitled "**Development of the Tourism Industry as the Motor of Economic Growth in Indonesia.**"

I hope this article can be published in the IJSOC because exciting findings in the scientific report can become new treasures in science, especially in economic sciences.

I am willing to go through the review process following IJSOC standards.

Best Regards,

Dyah Poespita Ernawati

Editor and Reviewer comments:

Reviewer #1:

1. The abstract has not discussed the research objectives and results, so readers do not understand this journal.
2. The English in parts approaches is incomprehensible, so as a first step, a firm editorial hand would be needed to figure out what needs to be rethought.
3. The literature review has not explained the theories that are related and relevant to the research object and are well related to the study results.
4. The focus of this research can be developed for further study, both in Indonesia and abroad, because the research topic is very relevant to the novelty of other research.
5. References are good enough, but we still need to find the latest references so that this research becomes more up-to-date.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear

Dyah Poespita Ernawati  
Institut Pemerintahan Dalam Negeri (IPDN), Indonesia

Thank you for your efforts to make improvements to your article.

Based on the Reviewers' considerations, the article has, at some point, increased.

However, you have to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. The abstract already has a problem topic regarding the purpose of the method and the research results so the reader can easily understand.
2. The introduction has explained the research's background, purpose, and use.
3. The literature review has explained well the related theories that are relevant to the object of the research results.
4. The focus of the research can be developed for further study, both for research in Indonesia and abroad.
5. References are good enough, and the latest connections are more up-to-date.

Articles that have been revised and please send them back via this email.
